Speeding Up Your Workflow with Articulate 360

Nicola Appel
Articulate Inc.

Common e-learning development challenges

Introducing Articulate 360, everything you need for every aspect of course development

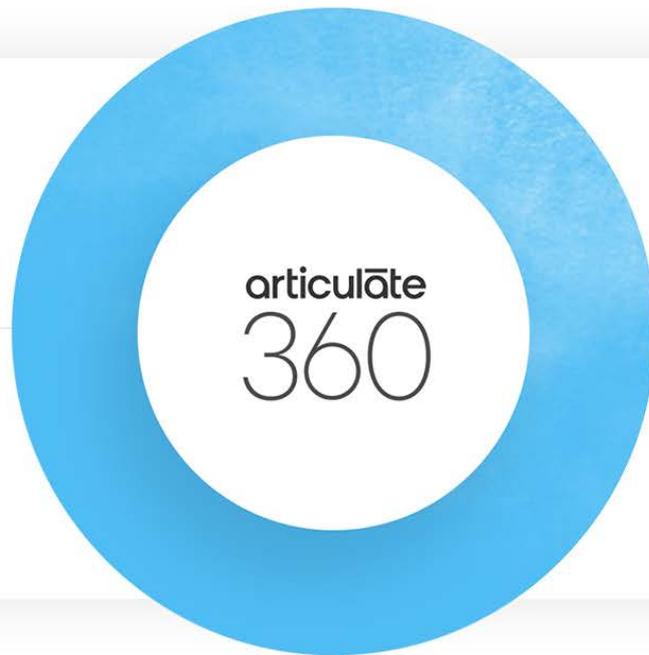

Award-Winning Authoring Tools

Storyline 360,
Rise, and more

Project Review App

1.5+ Million Course Assets

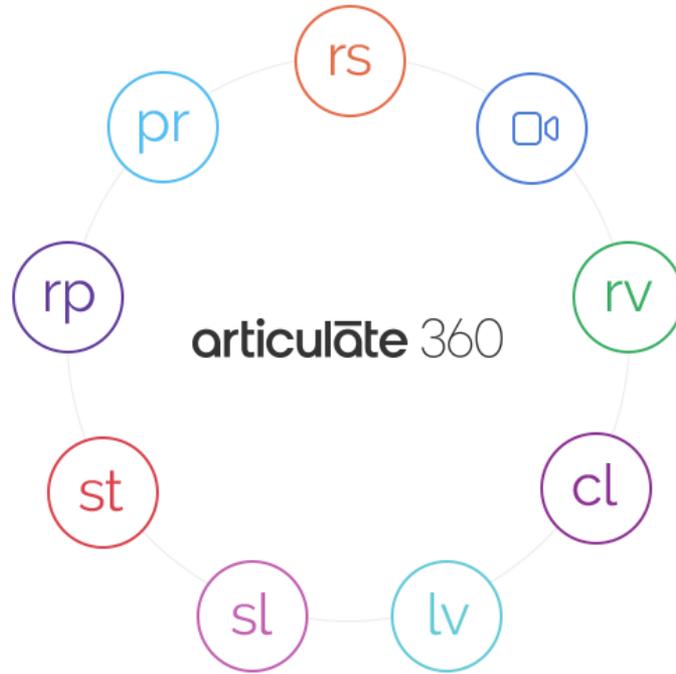

Templates, characters,
photos, videos, icons,
and more

Live Online Training

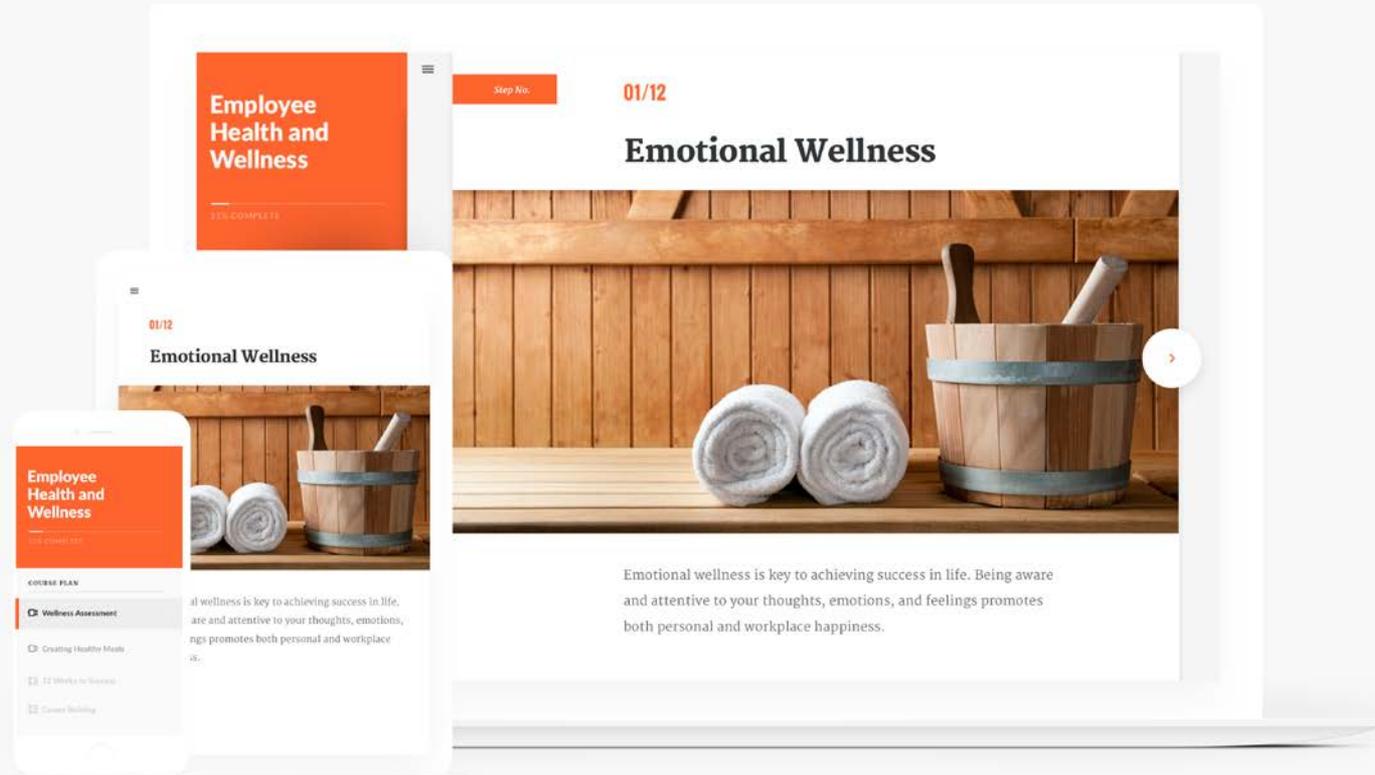

Authoring apps * Assets* Project review app * Training

sl st Interactive, slide-based courses with Storyline 360
PowerPoint based courses with Studio 360

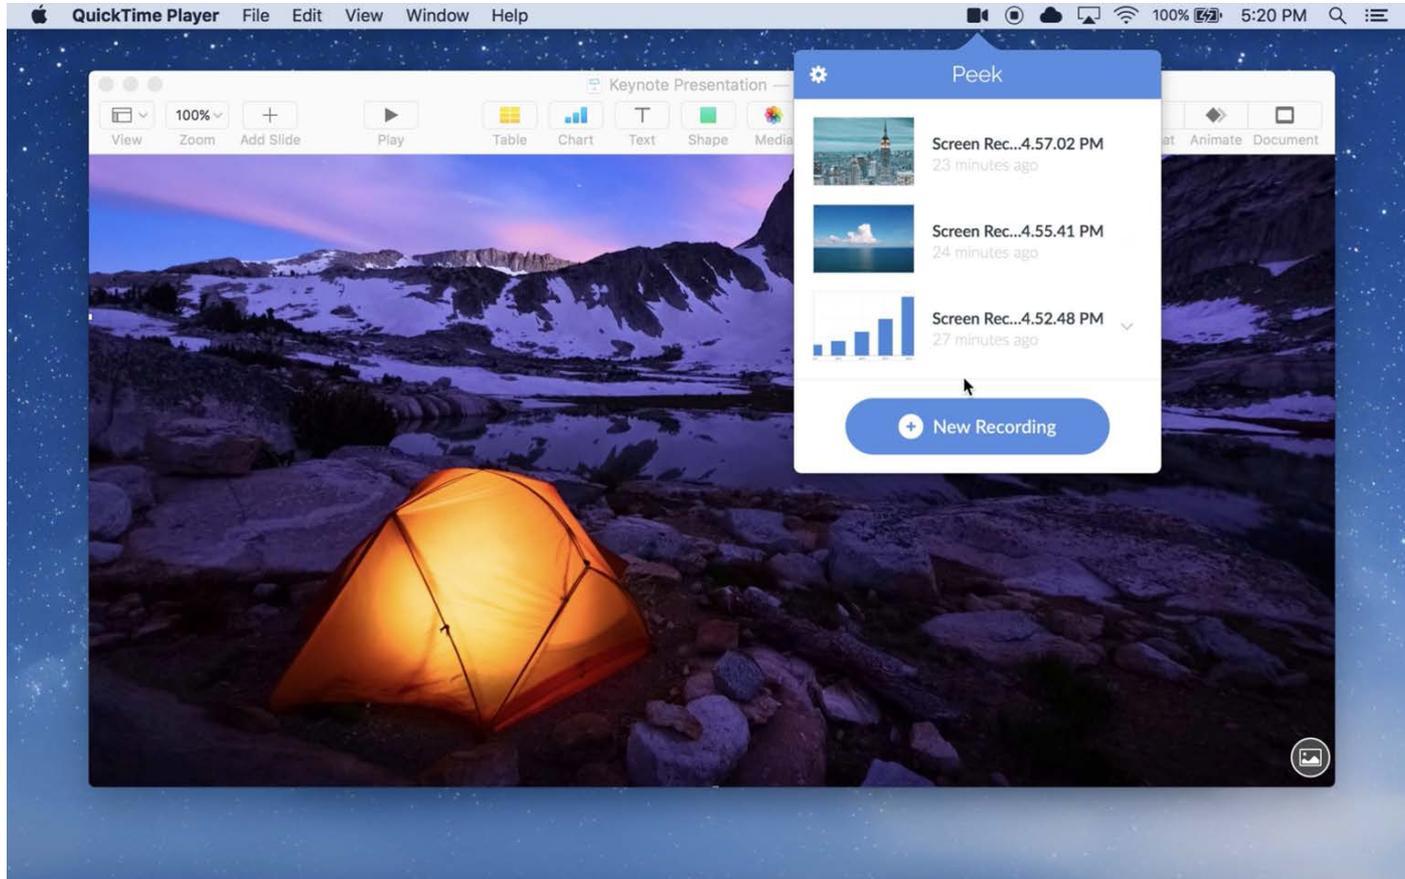

rs Responsive, web-based courses with Rise

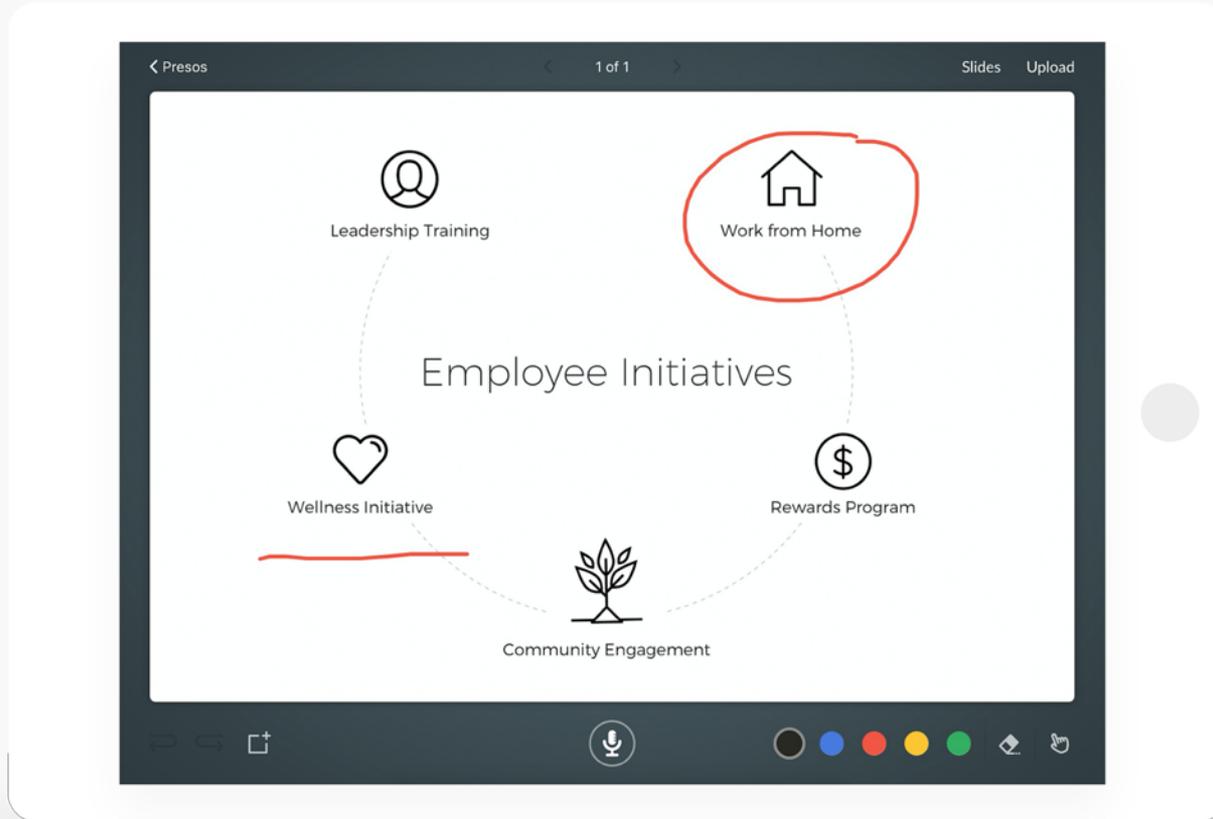

rp Screencast with webcam with Replay 360

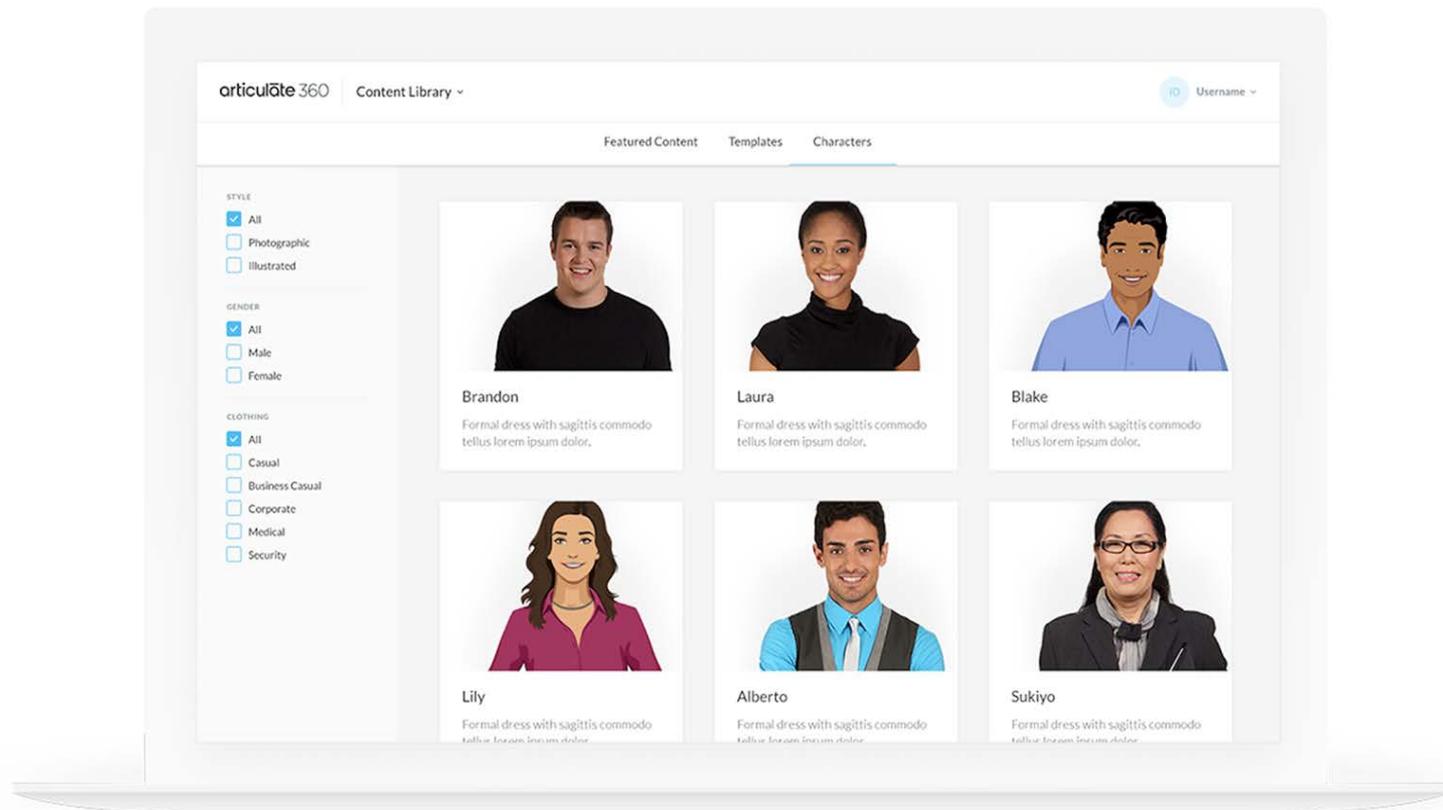

Quick screencasts with Peek

pr Informal training videos with Preso

cl Plus photographic & illustrated characters

rv Simplify review process with Articulate Review

The screenshot shows the Articulate Review interface for a slide titled "Introduction to BMPs" from a course called "The Clean Water Act, Version 3". The slide content includes a photograph of a person working on a dirt slope with a grid product, and a blue text box with the following text:

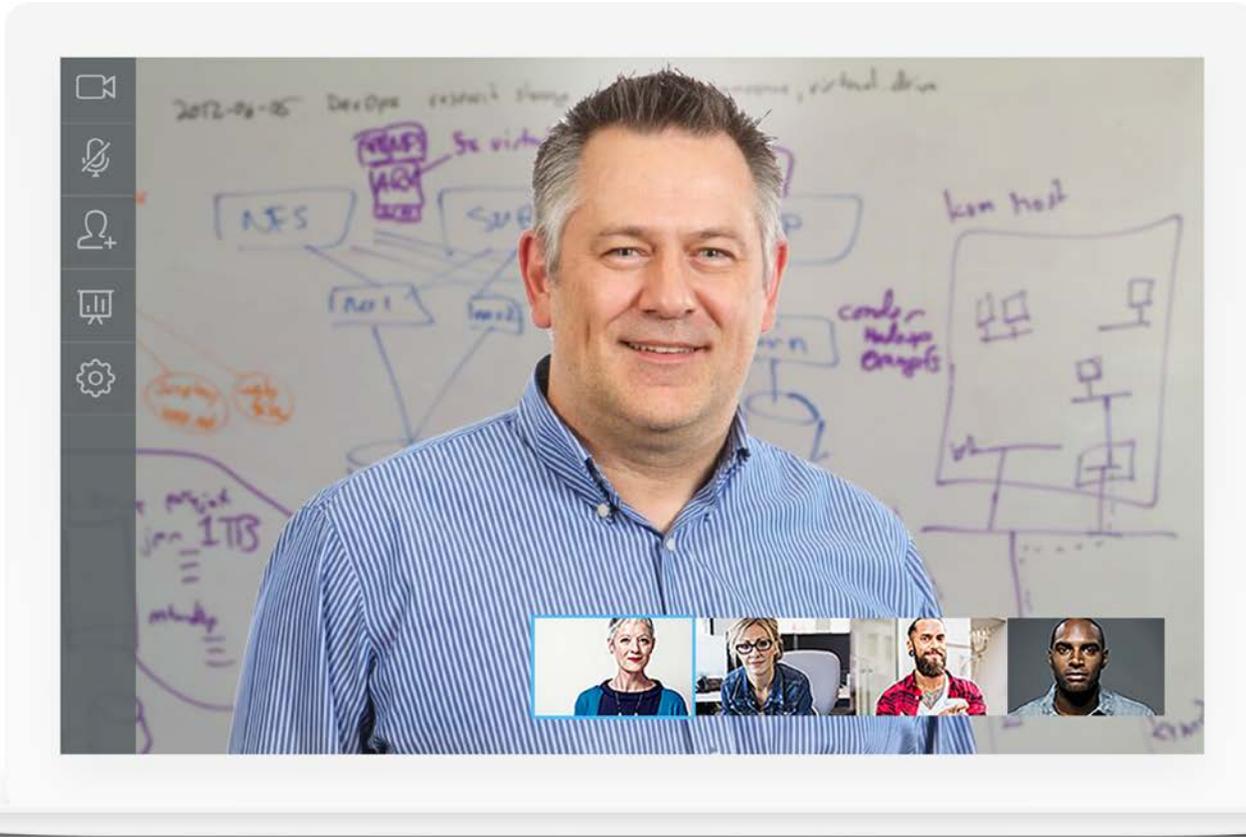

Introduction to BMPs

In this section of the course, we'll review common best management practices for temporary soil stabilization and tracking control. We'll look at some common approaches such as hydroseeding, geotextiles, silt fences, and sandbag barriers.

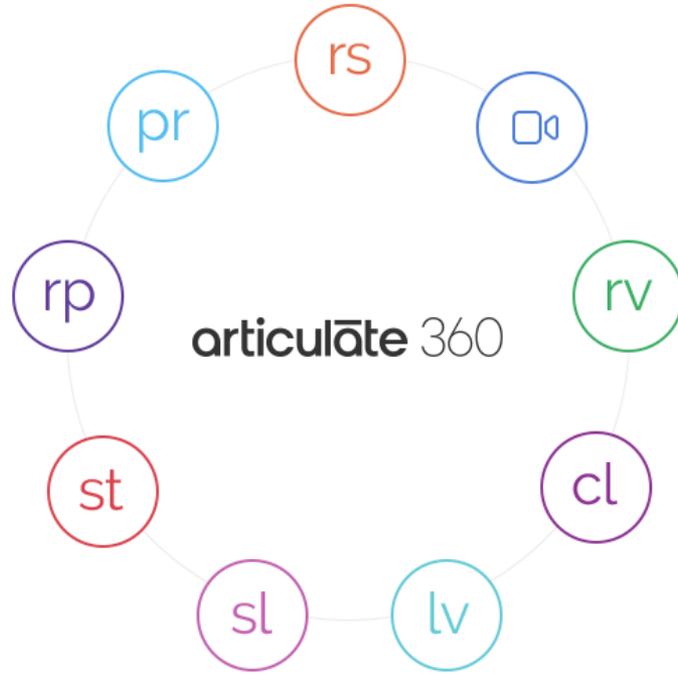

The right-hand side of the interface displays a "REVIEW" panel with a "FEEDBACK" button showing 2 notifications and a "SHARE" button. Below these are several comments:

- Anthony Smith** (45m): Carolyn, the narration script for this slide has an acronym with the letters SWPPP. Should the narrator pronounce each individual letter, or simply pronounce it as "swip".
- Carolyn Zhang** (1d): Anthony, please have the narrator pronounce it as "swip".
- Carolyn Zhang** (2h): Anthony, the image on this slide is showing a grid product. I like it, but I think an image of hydraulic mulch being applied along completed road construction would be better here.
- Anthony Smith** (15m): Not a problem, I think we've got some imagery from our field shoot last week.
- Carolyn Zhang** (2h): On this slide, I'm noticing a constant stutter in the narration. It's not even 10% of the time.
